

Tomek Sułkowski

Front-end Coach & Consultant

ABOUT ME

I am an experienced IT trainer specializing in browsers-related technologies. My main area of focus is **Angular 2 framework** and its ecosystem.

In the last 3 years I have worked with multiple medium and large-sized companies to help their developers increase their level of expertise in front-end technologies.

EXPERIENCE

I have conducted **over 1300 hours of trainings**. Some of the companies I've worked with are listed below.

The average rating of trainings conducted by me is **93%**.

I am also working as an active developer. Recently I have been involved with:

- *Stibo Systems* - global leader in multi-domain Master Data Management
- *CrossEngage* - cloud-based open marketing platform based in Berlin
- *Hexagram* - native advertising platform based in New York
- *Madkom* - provider of a document management software for public administration in Poland

FORMS OF TRAINING

	on site	online
Intensive 2-5 days training	✓	✓
Weekend workshops	✓	✓
Afternoon training sessions	x	✓

Regardless of the chosen form, the trainings are focused on practical aspects and solutions that I have found to be the most effective.

Each training's syllabus is tailored to a specific client following a set of interviews.

TECH | TEACH

AngularJS is the most popular framework for building browser apps and its next iteration, brand new **Angular 2** is already gaining a lot of traction.

React is the library of choice for many front-end programmers and when combined with **Redux** state container it makes a great alternative for Angular based technology stack.

Node.js is a technology that enabled developers to build a lot of productivity-increasing tools.

It's also a runtime that allows us to use JavaScript as a backend language.
